DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Terms which make the claims indefinite include: "it", "exactly", "known type", "becoming an integral part of it" in claim 1, "some holes", "equivalent number" in claim 2, "the fact", "suitable" in claim 3. Terms in the claims which lack proper antecedent basis include: "the two sides", "the body" in claim 1, "the anti-overturn means", "the rear end", "the telescopic guide" in claim 4, "the anti-loosening means", "the intermediate tongue" in claim 5.

Claims 1-5 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-4, as presented, is rejected under 35 U.S.C. 103(a) as being unpatentable over Rock et al and further in view of Langenberg et al. Rock is cited showing a element 66 housing a guide 18, a notch 67 engages a hook 64 to prevent overturn and capable of being fixed to a rack. Langenberg is cited showing a element 6 with holes S, figure 28, for the purpose of attaching a rack 47. Since the references are from the same field of endeavor the purpose of Langenberg would have been obvious in the pertinent art of Rock at the time of the invention it would have been obvious for one having an ordinary skill in the art to have modified Rock with holes for the purpose of attaching a rack in view of Langenberg.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jernstrom et al, Sandin, Dibble

Allowable Subject Matter

Claims 5 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
